Electrical Contracting

The team at Reliance Electric offers exemplary electrical services from project conception to completion, but what sets us apart is our reliability, proactiveness and unmatched workmanship.

Communications Technology

The Reliance team's telecommunications specialists provide solutions for telecommunications installation and setup, including network wiring, fire alarm, security and CCTV systems and more.

Specialty Services

Reliance Electric offers fire alarm monitoring services, full-service lighting options and retrofits, in-plant and commercial electrical services, generator systems, and power quality analysis.

Expect Excellence®

The Reliance team is chosen again and again by general contractors across the country on **large-scale construction projects** for our expertise, quality of work, dedication to safety and professionalism.

Serving commercial, hospitality and multi-residential clients across the US for over thirty years, the experienced team at Reliance Electric brings vast expertise and deep dedication to quality to every project we work on.

Reliance Electric understands the important role electrical contractors are to the success of every construction project. Each project requires a high level of skill, knowledge and work ethic from every member of the construction team, and Reliance comes prepared to offer these qualities and more to contribute to an overall outstanding outcome.
